EDUCATION

B.S. Data Science 2028
Indian Institute of Technology, Madras
RPS Public School , Class XII 2023
Central Board of Secondary Education, Rewari, Haryana

SKILLS

Data Analysis	Statistical Modeling, Credit Risk Analysis, Data Cleaning, Storytelling
Tools	MS Excel, SQL, Power BI, Tableau, Python (Pandas, NumPy, Matplotlib)
Financial	Loan Portfolio Analysis, DTI Modeling, Financial Statement Analysis

PROJECTS

Loan Portfolio Risk Analysis
Excel, Financial Modeling, Credit Risk Analytics

- Analyzed 10,000 Lending Club loans to model default risk; identified DTI ratio >30 as the primary default predictor with a **3× higher risk multiplier** – directly applicable to credit underwriting and loan appraisal.
- Quantified borrower segment risk: mortgage holders at **16% default rate** vs. renters/owners at 21–22%, producing an income-stability scoring matrix for portfolio-level compliance reporting.
- Performed sample-size audit on Grade G loans ($n = 69$) to distinguish true risk shifts from statistical noise, demonstrating regulatory-grade analytical rigour for audit-trail documentation.

Credit-Inspired Customer Risk & Revenue Governance
SQL (SQLite), Python, Portfolio Risk Modeling

- Built a risk-segmentation framework classifying a multi-region database into **5 credit-style tiers** using percentile thresholds – mirroring customer credit scoring and risk governance in financial services.
- Engineered a SQL data pipeline (orders, returns, managers tables) to isolate revenue concentration risks, revealing that **80% of intervention targets** stemmed from return-behavior patterns, not pricing.

Enterprise BI & Global Sales Operations Dashboard
Power BI, PowerQuery M, DAX Modeling

- Consolidated **$24.9M revenue, $10.5M profit, and 25,200+ orders** across 6 countries into a single Power BI dashboard – comparable to multi-branch performance monitoring in BFSI operations.
- Built rolling calendar tables and DAX measures for real-time KPI tracking; identified a growth anomaly of **+200 customers/week** from August 2021 through drill-down analysis.

CERTIFICATIONS & VIRTUAL EXPERIENCE

Advanced SQL Certification
HackerRank

Data Analytics Virtual Experience
Deloitte Australia (via Forage)

- Conducted data discovery and prepared a pro-forma analysis to identify high-value customer segments using demographic and transaction data.

Professional Data Analyst Certification
TuteDude

- Completed 40+ hours of rigorous training in SQL, Excel, and Power BI, focusing on end-to-end data pipeline management and complex DAX measures.
